INTRODUCTION

I would like to point out that there will be no pictures in this Whitepaper. We do serious business and we don't need childish visuals to show it. Now it's time to talk about what we're going to do.

What is \$REGU?

\$REGU Token will be the token of the pre-sale platform we will establish. Those who want to participate in the pre-sales published on the platform must hold \$REGU. If you are not a holder of \$REGU, you cannot participate in the pre-sale. Don't worry, you can buy after it is listed. REGU team will give 100% right to purchase from pre-sales to \$REGU holders. We will do our best to select the best quality projects. You can trust us!

Why DeFi?

We believe that decentralized financial systems (DeFi) will change the world. We are determined to follow this belief. We created this project in order to bring more DeFi project developers to our world. We want to choose projects with high quality and goals. If you are a Blockchain developer, you need to contact us. There are entrepreneurs with a strong project and determination, but they don't have a backer or anyone to draw on. We will support them here. The future of cryptocurrencies is inevitable. States and governments will one day accept this. Everything in the world is going digital and is suitable for digitalization. One of the tools we use the most during the day – MONEY – why not be digital? One day this waste of paper and metal will be found to be unnecessary and everyone will accept crypto. When that day comes, the value of decentralized financial systems will be invaluable and we will start a new era. We will take our place at the top in the future. See you DeFi lovers.

WHY BSC?

There's more than one reason, of course. We do not want to examine them in substance. We will explain it as simply as possible.

First of all, let's consider the ease of operation and cheapness. When we use Binance Smart Chain (BSC), we can perform our transactions much faster and cheaper than other networks. With this in mind, Team REGU chose Binance Smart Chain. To take with examples, Uniswap will charge a transaction fee of \$20 to \$100 in transaction fees. The processing time will take an average of 1 minute when we consider the slowness of the Ethereum network. When we do the same transaction on PancakeSwap with Binance Smart Chain, we will pay a fee between \$0.05 and \$0.5 and the return time will be 3 seconds on average. These two reasons were the main reasons for us to use Binance Smart Chain.

Binance Smart Chain is a network for Binance Coin (BNB), which currently has one of the largest holders in the world. As you can see from its name, the owner of this coin is Binance, the world's largest and most reliable exchange. We will never doubt that such a great power is behind this network.

Metamask and Trustwallet are the two most used wallets in the world right now. Both of these wallets have Binance Smart Chain support. Trustwallet was acquired and developed by Binance in the past years. The fact that it is supported by these two strong wallets is one of the factors that played a big role in our BSC selection.

There are many more reasons, but lastly, we can say that it is compatible with DeFi projects. We think that it is the system that will carry us to the top in decentralized systems. We cannot see the convenience and quality of smart contracts in other networks. Binance Smart Chain makes us and other developers excited and happy about this. At the same time, it offers its investors a high quality, safe, fast and inexpensive service. The best choice in terms of price-performance. We will always take advantage of their convenience and developer strategies. Thank you Binance Smart Chain and CZ.

ROADMAP

Q1 2022

IDO Platform Launching v1
Announcing First Ido
Announcing Partnerships
Airdrop & Bounty
CertiK Audit
More Dex Listing

Q3 2022

More Cex Listing (Top10)
IDO Platform Launching v2
RoadMap v2 Launching
Matic & Polygon Network Launching

Q4 2021

Pre-Sale
Aggresive Marketing
Airdrop
PancakeSwap Listing
\$REGU on CMC & Coingecko
Stake & Farming v1

Q2 2022

First Cex Listing (Top20)
Android & IOS Apps
\$REGU Wallet
Stake & Farming v2
\$REGU Holders Voting for Management

\$REGU WORKS

IDO Platform

The highlight of our project. After the launch, we will quickly set up the IDO Platform. Pre-sales of new DeFi projects will be made on this platform we have established. We will strive to select the best quality and most up-to-date projects. Thank you for not leaving us alone on this path and supporting us. You will get the best in return!

Staking Reward System

We will install Staking and Yield Farming systems. There will be high APY in the process until the IDO Platform is established. Then the APY will be slightly reduced. Liquidity providers will be deemed to be holding \$REGU. Tiers will not forget their liquidity providers and will be shaped according to them.

CEX & DEX Listing

First we will have our DEX Listing. Early CEX Listing can be fatal in a project like this. After completing many DEX listings, we will be listed on one or more of the Top 20 exchanges. The project will become bigger every day and in a few months you will be able to see us in one or more of the Top 10 exchanges. This is really exciting!

Quality Partnerships

We may not be well known right now. Soon, everyone will hear our name with our partnerships and the great work we do. We will never forget anyone who trusted us from the very beginning. You will be rewarded with many prizes and Airdrops. We will establish strong future-oriented partnerships with many Central or Decentralized businesses.

TIERS

Regu holders will always be eligible to receive from IDOs. Do not worry! More or less, we will have tiers for every budget. You can learn about our tiers from the tables below.

<p>KITTEN</p> <p>STAKING REQUIREMENT 10.000</p> <p>GUARENTEE ALLOCATION YES</p>	<p>LYNX</p> <p>STAKING REQUIREMENT 20.000</p> <p>GUARENTEE ALLOCATION YES</p>
<p>CHEETAH</p> <p>STAKING REQUIREMENT 35.000</p> <p>GUARENTEE ALLOCATION YES</p>	<p>LEOPARD</p> <p>STAKING REQUIREMENT 75.000</p> <p>GUARENTEE ALLOCATION YES</p>
<p>PUMA</p> <p>STAKING REQUIREMENT 125.000</p> <p>GUARENTEE ALLOCATION YES</p>	<p>LION KING</p> <p>STAKING REQUIREMENT 250.000</p> <p>GUARENTEE ALLOCATION YES</p>

TOKENOMICS

Team Tokens Locked Until 2023 (Unlock 10% every month after Jan 2023)

Liquidity Locked Always.

→Name: Regular Presale

→Symbol: \$REGU

→Network: Binance Smart Chain (BSC)

→Contract:

→Stage 1: \$0.011 (11,000,000 \$REGU)

→Stage 2: \$0.013 (13,000,000 \$REGU)

→Stage 3: \$0.016 (16,000,000 \$REGU)

→Allocation of Pre-Sale: 40,000,000 \$REGU

→Listing Price: \$0.02
